

Aquaculture Fish Nets Antifouling

**Copper Based
Wax System**

**Fresh Water
Hybrid System**

**Copper-Free
Wax System**

Low price, High performance...

Export

Russia, Azerbaijan, Spain, Greece, Denmark, Egypt, Tunisia, Algeria, Albania, Kazakhstan, Kyrgyzstan, Israel, Iran, Saudi Arabia

Since 2005, we have been producing Antifouling paints with a capacity of 2 million liter per year.

Product No	Antifouling Product Details
SW-40	Has been modified with a wax. LONG LIFE ! Surface is long-lasting thanks to its strong coating and thickness. Superior performance in tropical, cold and polluted waters up to 9-15 months. Contains high levels of copper oxide. Protects the nets against external factors and UV rays. Flex structure, controlled dissolution. Concentrated product, diluted with 50% water by volume. Color: Red
SW- 20	The hybrid polymer resin system has been modified with wax. LONG LIFE ! Its surface is long-lasting thanks to its strong coating and thickness. Superior performance in tropical, cold and polluted waters up to 9-12-15 months. Contains high levels of copper oxide. Protects the nets against external factors and UV rays. Semi flex structure, controlled dissolution. Concentrated product, diluted with 100% water by volume. Color: Red
SW-10	The hybrid polymer resin system has been modified with wax. LONG LIFE ! Surface is long-lasting thanks to its strong coating and thickness. Superior performance in tropical, cold and polluted waters up to 9-12 months. Contains high levels of copper oxide. Protects the nets against external factors and UV rays. Semi flex structure, controlled dissolution. Concentrated product, diluted with 100% water by volume. Color: Red
SW- 5 Fresh Water	Used in fresh waters and seas with low salinity. Recommended for waters temperature lower than 19 C degrees. High performance against many organisms in freshwater up to 9 months. Contains low active ingredient. Protects the nets against external factors and UV rays. Flexible structure. Economical product. Contains low active ingredient. Concentrated product, diluted with 100% water by volume. Color : Red - Black
CF-30 Copper Oxide-Free	Does not contain copper oxide. The hybrid polymer resin system has been modified with wax. LONG LIFE ! Its surface is long-lasting thanks to its strong coating and thickness. Superior performance in tropical, cold and polluted waters up to 9-12 months. Protects the nets against external factors and UV rays. Flex structure, controlled dissolution. Ready-to-use product, not thinned. Color: Oxide Yellow
ST-5 Protecting Coat	Water-based Net Paint has protective properties. It has saturated and vibrant color power. Semi Flex. Prevents fish such as Cot and Sea Bream from gnawing the net and extends the life of the net. Protects the net from the corrosive effects of the sea and UV rays. * When used as a primer, it reduces Antifouling consumption by 15-25%, It allows antifouling to remain on the surface longer. Its painting and coating power is high. It is a concentrated product, diluted with 150% volume of water. Color: Oxide Red - Black
